*Reasons for allowance*

1. This communication is in response to applicant's 10/06/2007 amendment in the application of Chiang for the "Method and apparatus for locking a table in a network switch" filed 12/15/2003. This application is a Continuation of the application 09/296,558 filed 04/22/1999 is now abandoned. The proposed amendment has been entered and made of record. Claim 12 has been canceled per Applicant's request, and claims 10, 13, 15 have been amended. The claims have been amended to better point out and more distinctly claim subject matter comprising the invention.

2. Claims 1-11, 13-16 are allowable as evident by applicant's amendment (Claims are renumbered as 1-15 respectively).

3. The following is an examiner's statement of reasons for allowance: The prior art of record fails to disclose or suggest a method of locking an address table within a network switch comprising the steps: allocating prescribed time slots for accessing the address table to various components of the network switch; determining, during a time slot allocated to a designated component, if any of the other components are currently transacting with the address table; locking out the designated component from accessing the address table, if one of the other components is currently transacting with the address table; and allowing the designated component access to the address table if none of the other components are currently transacting with the address table; an arrangement for controlling access to information stored within a

network switch comprising: an address table for storing entries that contain addresses of network stations connected to the network switch; a plurality of components configured to access said address table; and a scheduler for allocating prescribed time slots to said plurality of components for accessing said address table; each of said components being configured for determining if any other components are currently transacting with said address table during its allocated time slot, and accessing said address table if none of the other components are currently transacting with said address table; wherein a designated component of said plurality of components is configured to assert a lock signal indicating that said designated component is currently transacting with said address table, as specifically recited in the claims.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
